ABSTRACT:

PROBLEM TO BE SOLVED: To provide a printing cloth which is highly pliable and makes a feathering-free ultrasharp pattern through inkjet printing or dying, and a laminated postal matter using the cloth.

SOLUTION: The photographic cloth is made up of a laminate of (1) a cloth to which a water-absorbing substance is added, (2) a layer having a pressure-sensitive adhesive and/or a hot melt agent and (3) a release paper. Also the laminated postal matter uses the photographic cloth. (1) is the cloth containing 0.5 to 30 wt.% of the water-absorbing substance and (3) is the release paper to which the water-absorbing substance is added as well as the release agent.
